SUMMARY	Software Engineer with 10 years of experience building backend systems, distributed platforms, and cloud infrastructure — including 3+ years shipping product at a Berlin SaaS company. Strengths in system design, troubleshooting performance bottlenecks and taking products from architecture to production.	
EXPERIENCE	<u>Ninox Software GmbH — Berlin</u> Senior Software Engineer	Nov '22 – Feb '26
	- Designed and shipped core features of the low-code platform directly contributing to a sustained growth of 20% ARR - Scaled the platform and led performance investigations across the stack — profiling, query optimization, and caching — for a growing multi-tenant customer base - Worked directly with customer-facing teams to turn escalations into durable fixes and product improvements	
	<u>Seed Labs — Karachi</u> Senior Software Engineer	Oct '21 – Aug '22
	- Engineered a fault-tolerant, in-memory limit order book handling 100K TPS with zero data loss during node failures - Contributed to the backend systems: order-matching engine and blockchain settlement engine - Led migration to Kubernetes, significantly reducing fixed infrastructure costs while improving scalability	
	<u>Folio3 Software — Karachi</u> Senior Software Engineer	Nov '19 – Sep '21
	- Led development of ERP customizations and e-commerce integrations (NetSuite SuiteCloud, SuiteScript, React) for Fortune 500 clients - Created an internal knowledge base of ERP design patterns that measurably cut delivery time for routine projects	
	<u>Ivolve Technologies — Karachi</u> Senior Software Engineer	Jul '19 – Nov '19
	Built hybrid-cloud middleware integrating OpenStack with public clouds; developed monitoring pipelines (Elasticsearch, Graphite, Grafana)	
	<u>Cloud9 Networks FZE — Dubai</u> Software Engineer	Jul '16 – Jun '19
	- Architected and deployed a big-data analytics product (Hadoop, Hive, Java Spring) powering a customer-loyalty payment system in the MENA region - Built network/cloud monitoring systems covering thousands of customer premises devices, with alerting and ticketing integration; helped win a contract with a telecom giant	
SKILLS	Languages: TypeScript/JavaScript, Java, Python, Go, C++ Backend: Node.js, NestJS, Spring, Flask; REST APIs, event-driven systems (Kafka, RabbitMQ, Redis) Data: Postgres, MySQL, MongoDB, Elasticsearch, InfluxDB, Hadoop/Hive, Spark Cloud: Kubernetes, AWS, OpenStack, Docker, Prometheus, Grafana	
EDUCATION	<u>National University of Computer and Emerging Sciences</u> Bachelor of Science in Computer Science	
	- Research Assistant (Machine Learning): Generation of Sokoban Stages using Recurrent Neural Networks — IJACSA Vol. 8, No. 3, 2017 - Systems Engineer, Nvidia HPC Lab: Built and maintained MPI and Hadoop cluster	
LANGUAGES	English (fluent), German (conversational)
